

TECHNIFAST

*Manufacturers & Distributors of Pins, Spacers,
Keys, Inserts and Special Turned Parts,
Certified to BS EN ISO 9001:2015*

Date – 18/07/2024

Reference; CBAM (Carbon Boarder Adjustment Mechanism)

To whom it may concern

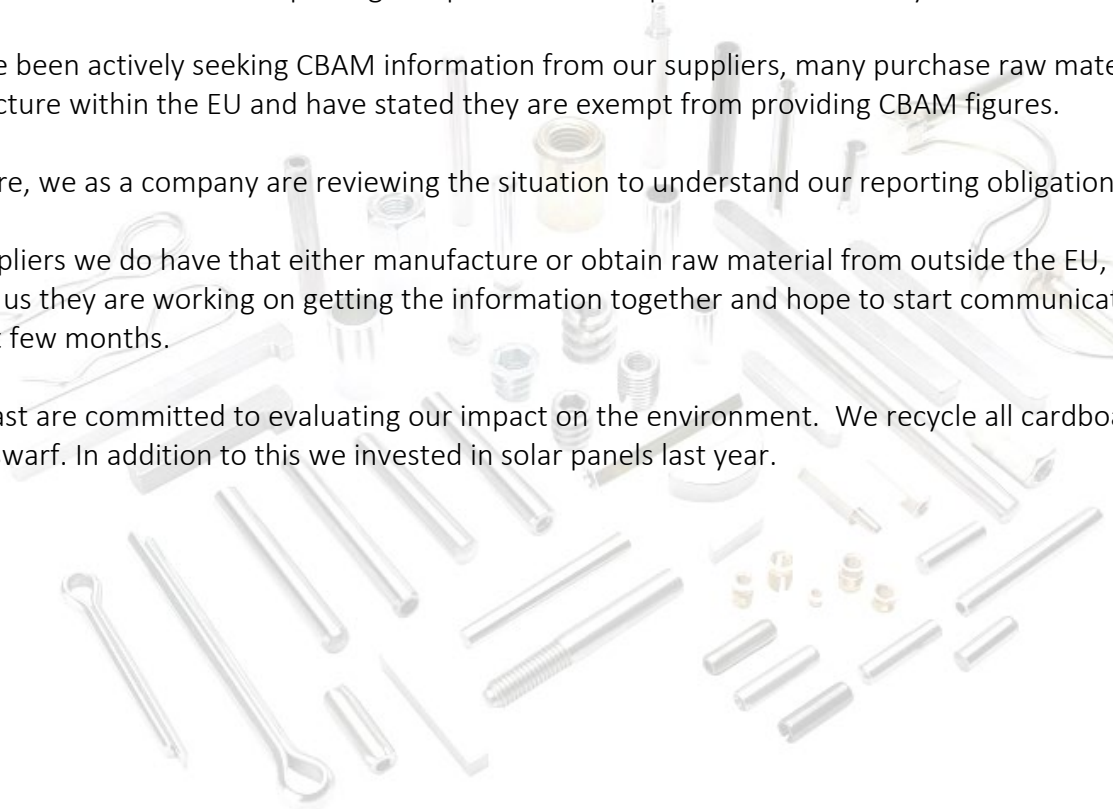

Under current European Union (EU) law, EU importers of fasteners under CN code 7318 must report to the EU the CO2 emissions during the production of the imported fasteners, as well as other data relating to the manufacture. Similar reporting is expected to be implemented in January 2027 in the UK.

We have been actively seeking CBAM information from our suppliers, many purchase raw material and manufacture within the EU and have stated they are exempt from providing CBAM figures.

Therefore, we as a company are reviewing the situation to understand our reporting obligations.

The suppliers we do have that either manufacture or obtain raw material from outside the EU, have assured us they are working on getting the information together and hope to start communicating within the next few months.

Technifast are committed to evaluating our impact on the environment. We recycle all cardboard, paper, oil and swarf. In addition to this we invested in solar panels last year.
